Insinööri (AMK)

Tieto- ja viestintätekniikka

Acceptance Test Plan

04.05.2026

Sisällys

1. Purpose 1
2. Acceptance criteria 1
3. Coverage 2
4. Test cases 3
5. User stories 10

1. Purpose

The purpose of this acceptance testing plan is to define the acceptance criteria and test cases for PlantSnap. THe acceptance tests are created based on the project requirements and user stories

The goal of this testing is to verify that the system meets user requirements and is ready for deployment.

2. Acceptance criteria

Functional testing

- F1 User can sign in with Google SSO using a metropolia google account
- F2 User can take a photo of a plant and receive species identification results
- F3 User can view AI-generated plant details
- F4 User can you view scan history
- F5 User can save a plant to My Garden and remove it
- F6 User can mark a scan as a favourite
- F7 User can view the Plant of the Day on the home screen
- F8 User can change the app theme
- F9 User can view the GPS location of a scan on a map
- F10 Safety alerts are shown for toxic plants based on user's pet profile
- F11 User can sign out and is redirected to authentication screen

Performance and reliability testing

- Main screens load within 5 seconds
- Ui elements respond to interaction within 1 second
- App does not crash during normal use

Usability testing

- The user interface is intuitive and the user can find core functionality without guidance

3. Coverage

Acceptance criteria	User story	Test case	Test case id.
F1	US-01	Sign in	TC-01
F2	US-02	Plant identification	TC-02
F3	US-03	Plant detail screen	TC-03
F4	US-04	Scan history	TC-04
F5	US-05	My garden	TC-05
F6	US-06	Favourites	TC-06
F7	US-07	Plant of the day	TC-07
F8	US-08	Settings	TC-08
F9	US-09	Scan location map	TC-09
F10	US-10	Safety alerts	TC-10
F11	US-11	Sign out	TC-11
F1-11	-	Usability testing	TC-01-TC-11
F1-11	-	Performance and Reliability	TC-01-TC-11

4. Test cases

Test case id.	TC-01	Test case:	Sign in
System	PlantSnap	SubSystem	Authentication

Description: Verifies that a user can sign in to PlantSnap using Google Sign-in

Step	Action	Expected Response	Result
1	Open PlantSnap app	App launches and home screen is displayed	Pass
2	Tap ‘Profile’	Profile screen is shown	Pass
3	Tap ‘Sign in with google’	Sign- in is processed	Pass
4	Wait for profile screen	User is redirected to profile screen	Pass

Test case id.	TC-02	Test case:	Plant identification
System	PlantSnap	SubSystem	Identification

Description: Verifies that a user take a photo of a plant and receive a ranked list of species candidates

Step	Action	Expected Response	Result
1	Tap the identify tab	Camera screen loads and live preview is visible	Pass

2	Tap the capture button	Photo is taken and shutter animation plays	Pass
	Tap review button and confirm	Shows preview of photo where you can retake	Pass
3	Wait for identification results	Results screen loads with at least one species candidate showing a name and a score	Pass
4	Tap a candidate from the list	Plant detail screen opens for the selected species	Pass

Test case id.	TC-03	Test case:	Plant Detail Screen
System	PlantSnap	SubSystem	Detail

Description: Verifies that the plant detail screen shows Ai-generated care guide, habitat information, and toxicity data

Step	Action	Expected Response	Result
1	Open any identified plant from results	Plant detail screen loads with additional information	Pass
2	Scroll down to the care section	Care guide items are displayed light, water, temperature, humidity and soil	Pass
3	Scroll to the toxicity section	Toxicity information is	Pass

		shown	
4	Scroll to the habitat section	At least one habitat card is displayed with a title and description	Pass
5	Scroll to the description section	A plant description paragraph is visible	Pass
6	Scroll to the bottom of the screen	All sections have loaded without errors	Pass

Test case id.	TC-04	Test case:	Scan History
System	PlantSnap	SubSystem	History

Description: Verifies that a user can view previous plant identifications

Step	Action	Expected Response	Result
1	Navigate to profile screen	Profile screen loads	Pass
2	Tap the history button	Scan history screen loads	Pass
3	Verify that at least one previous scan is listed	Scan entries are shown with plant name and timestamp	Pass
4	Tap a scan from the list	Plant detail screen opens for the selected scan	Pass

Test case id.	TC-05	Test case:	My Garden
System	PlantSnap	SubSystem	My Garden

Description: Verifies that a user can save a plant to My Garden from the detail screen

Step	Action	Expected Response	Result
1	Open a plant detail screen	Plant detail screen is visible	Pass
2	Tap ‘Add to garden’ button	Button state changes to indicate the plant is saved	Pass
3	Navigate to My Garden screen	My Garden screen loads and then the saved plant appears in the list	Pass
4	Return to the plant detail screen	Plant detail screen reopens	Pass
5	Tap the three dots to remove from garden	Button state revers, plant is removed from My Garden	Pass

Test case id.	TC-06	Test case:	Favourites
System	PlantSnap	SubSystem	Favourites

Description: Verifies that a user can mark a scan as a favourite

Step	Action	Expected Response	Result

1	Open a plant detail screen	Plant detail screen is visible	Pass
2	Tap the favourite (heart) icon in the top bar	Icon fills red to indicate the scan is favourited	Pass
3	Navigate away and return to the same scan	Favourite icon is still shown as active	Pass
4	Tap the heart icon again	Icon returns to unfilled, scan is no longer favourited	Pass

Test case id.	TC-07	Test case:	Plant of the day
System	PlantSnap	SubSystem	Home

Description: Verifies that the plant of the day is displayed on the home screen and the detail view opens

Step	Action	Expected Response	Result
1	Open the home screen	Home screen loads and a plant of the day card is visible with a plant name and image	Pass
2	Tap Learn more on the plant of the day card	Plant of the day detail screen opens showing care, habitat, and toxicity information	Pass
3	Close the app and reopen within the same day	The same Plant of the day is shown - it is served from local	Pass

		cache without a new API call	

Test case id.	TC-08	Test case:	Settings
System	PlantSnap	SubSystem	Settings

Description: Verifies that a user can change the app theme

Step	Action	Expected Response	Result
1	Navigate to profile and select settings	Settings screen opens	Pass
2	Tap theme and select Dark	Bottom sheet picker opens and selecting Dark closes the sheet and the app switched to dark theme	Pass
3	Tap theme again and select System default	App theme reverts to follow system settings	Pass

Test case id.	TC-09	Test case:	Scan location map
System	PlantSnap	SubSystem	Detail

Description: Verifies that a map showing the scan location is displayed when GPS was captured at identification time

Step	Action	Expected Response	Result

1	Perfrom a new plant identification with location services enabled	Identification completed and results screen is shown	Pass
2	Open the plant detail screen for the new scan	Plant detail screen loads	Pass
3	Map of habitat is showing	A scan location of habitat is shown	Fail

Test case id.	TC-10	Test case:	Safety Alerts
System	PlantSnap	SubSystem	Safety

Description: Verifies that pet toxicity safety alerts are shown when the user has a pet set in their profile and a toxic plant is viewed

Step	Action	Expected Response	Result
1	Open the plant detail screen for a plant known to be toxic to pets	Plant detail screen loads	Pass
2	Scroll to the safety alerts section	A warning card is displayed with the pet type, toxicity level, and symptom information	Pass

Test case id.	TC-11	Test case:	Sign out
System	PlantSnap	SubSystem	Authentication

Description: Verifies that a user can sign out and the session ends successfully

Step	Action	Expected Response	Result
1	Navigate to the profile screen	Profile screen is visible with user's name	Pass
2	Tap Sign out	Session and the authentication screen is displayed	Pass

5. User stories

US-01 As a user, I want to sign in so that i can access my data across devices
US-02 As a user, I want to take a photo of a plant and receive instant species Identification
US-03 As a user, I want to view AI-generated care guides, habitat information, and toxicity data for an identified plant.
US-04 As a user, I want to see a history of my previous plant identifications
US-05 As a user, I want to save plants to My Garden so that i can track my collection
US-06 As a user, I want to mark scans as favourites so that i can find important identifications easily
US-07 As a user, I want to see a daily plant recommendation on the home screen
US-08 As a user, I want to customise the app theme in the settings
US-09 As a user I want to see where i took a photo on a map
US-10 As a user with a pet, I want to see safety alerts when a plant is toxic to my cat or dog
US-11 As a user, I want to sign out so that others cannot access my data on the device
